PROFESSIONAL SUMMARY

Full-Stack Software Engineer experienced in building production web applications from responsive user interfaces to backend APIs, databases, and deployment. Skilled in Laravel, Node.js, NestJS, Express.js, Next.js, React, MySQL, PostgreSQL, REST API development, Docker, and Linux, with experience developing business systems involving inventory, payments, dashboards, reporting, QR/PDF generation, and automation. Adaptable and quick to learn new tools, frameworks, and programming languages based on project needs.

CORE EXPERTISE

- Full-Stack Web Application Development
- Laravel & Node.js Backend Development
- NestJS / Express.js REST API Development
- React / Next.js Frontend Development
- MySQL Database Design & Optimization
- Authentication, Payments, Inventory & Dashboard Systems
- Docker, Linux Deployment & Background Jobs

TECHNICAL SKILLS

- **Frontend:** React, Next.js, JavaScript, TypeScript, Bootstrap
- **Backend:** Laravel, Node.js, NestJS, Express.js, REST API, GraphQL, queues, WebSocket
- **Database & Cloud Storage:** MySQL, PostgreSQL, MongoDB, Supabase, SQLite
- **Mobile:** Flutter, Dart, Firebase
- **DevOps & Tools:** Docker, Linux CLI, Apache, Nginx, Git, GitLab, GitHub, Postman

PROFESSIONAL EXPERIENCE

Software Engineer — Blyon Group Berhad (Feb 2026 – Present)

- Developed full-stack Laravel business modules with responsive interfaces and backend workflows
- Built and maintained REST API integrations using Laravel and Node.js patterns with validation, error handling, and production reliability in mind
- Optimized MySQL queries and application logic to improve performance across business operations
- Collaborated with teams to troubleshoot production issues and deliver features efficiently

Software Engineer — Bytes Security Malaysia PLT (Feb 2025 – Jan 2026)

- Built and enhanced secure Laravel web applications with JavaScript-based interfaces
- Implemented backend logic, authentication flows, validation, and database-driven features
- Improved backend performance, code quality, and maintainability within project timelines

Intern Full Stack Developer — MSC Management Service Sdn Bhd (Dec 2024 – Jan 2025)

- Developed web and mobile modules using Laravel, Node.js, Express.js, and Flutter
- Automated workflows improving operational efficiency by ~30%
- Optimized database queries reducing execution time by ~40%

KEY PROJECTS

BMS Fastentix

- Built a multi-tenant business platform including dashboards, inventory, reseller subscriptions, payment, and invoice modules
- Developed responsive admin interfaces, REST APIs, PDF/QR generation, and reporting workflows
- Configured background jobs, cron/Supervisor, Docker/Linux deployment, and multi-server automation scripts
- Improved system reliability and scalability in production

Fintel – Finance Intelligence Management

- Designed and developing an intelligent finance management system using Next.js, TypeScript, and MySQL
- Implementing an AI-driven budgeting engine that analyzes spending behaviour, generates budgets, and provides savings recommendations

Mosque Financial Management System

- Developed a SaaS multi-tenant mosque finance system using Node.js, Express.js, React, and PostgreSQL
- Built cashbook, ledger, bank reconciliation, accounts payable, accounts receivable, dashboard, and reporting modules
- Implemented subscription management and Stripe payment integration to support SaaS billing workflows

Yayasan Kebajikan Negara MYPSSS System

- Developed a welfare care and counselling system for YKN counsellors to manage programs, events, clients, appointments, and counselling workflows
- Built digital counselling assessments for public clients, including DASS, GAD-7, and Roda Keseimbangan Hidup questionnaires
- Implemented counselling notes, next-appointment scheduling, third-party referral tracking for serious cases such as PDRM/AADK, and reporting modules

Remote Mouse

- Developed a Flutter mobile app with a Python desktop server for remote computer control
- Implemented real-time communication using WebSocket for responsive cross-device interaction

LRecodexTerm

- Built a Linux GUI terminal supporting SSH and SFTP for remote server management
- Simplified file transfer and server access workflows through a dedicated desktop tool

EDUCATION

Bachelor of Computer Science (Software Engineering) with Honors — University Malaysia Terengganu (2022–2025)

CERTIFICATIONS

- IBM Full Stack Developer Professional Certificate
- Docker Foundations Professional Certificate
- Ubuntu Linux Professional Certificate
