PROFESSIONAL SUMMARY

Full-stack Software Engineer with a strong focus on backend systems and DevOps, experienced in building scalable, production-ready applications using Laravel, Node.js, React, Next.js and Flutter. Skilled in designing RESTful APIs, background job processing, and Docker-based deployments on Linux environments.

CORE EXPERTISE

- Backend Engineering (Laravel, Node.js, Express)
- RESTful API Design & System Architecture
- Database Optimization & Performance Tuning
- Queues, Background Jobs & Automation
- Dockerized Deployment & Linux Environments
- Full-Stack Development (React, Flutter)

TECHNICAL SKILLS

- **Languages:** PHP, JavaScript, TypeScript, Java, Dart, Python
- **Frameworks:** Laravel, Node.js, React, Next.js, Flutter, Django
- **Databases:** MySQL, PostgreSQL, MongoDB, Firebase, SQLite
- **DevOps:** Docker, Linux CLI, Apache, Nginx
- **Tools:** Git, GitLab, GitHub, Postman, WebSocket

PROFESSIONAL EXPERIENCE

Software Engineer — Blyon Group Berhad (Feb 2026 – Present)

- Developed and maintained scalable Laravel-based applications with modern JavaScript frameworks
- Designed backend architecture and optimized database performance
- Implemented API integrations with validation and error handling
- Collaborated with teams to resolve production issues and deliver features efficiently

Software Engineer — Bytes Security Malaysia PLT (Feb 2025 – Jan 2026)

- Built and enhanced secure web applications using Laravel and JavaScript frameworks
- Optimized backend performance and improved code quality
- Delivered features and fixes within project timelines

Intern Full Stack Developer — MSC Management Service Sdn Bhd (Dec 2024 – Jan 2025)

- Developed web and mobile modules using Laravel, Node.js, and Flutter
- Automated workflows improving operational efficiency by ~30%
- Optimized database queries reducing execution time by ~40%

KEY PROJECTS

BMS Fastentix

- Built multi-tenant platform including dashboards, inventory, and payment modules
- Implemented PDF/QR generation and REST APIs
- Developed automation scripts (Shell/Bash & .bat) for multi-server deployment
- Configured Supervisor and cron jobs for background processing and scheduling

- Improved system reliability and scalability in production

Fintel – Finance Intelligence Management

- Designed and developing an intelligent financial management system using Next.js, TypeScript, and MySQL
- Implementing an AI-driven budgeting engine that analyzes user spending behaviours, automatically generates personalized budgets, provides savings recommendations and financial improvement strategies

Remote Mouse

- Developed Flutter mobile app and Python desktop server
- Implemented real-time communication using WebSocket

LRecodexTerm

- Built Linux GUI terminal supporting SSH and SFTP
- Simplified remote server management and file transfer

LRecodexKatapat

- Built real-time multiplayer Wordle-style web application using React and WebSocket

LRecodexTriple

- Developed multiplayer card game with interactive UI and real-time logic

Yayasan Kebajikan Negara MYPSSS System

- Built scalable modules for workflows and reporting
- Developed APIs and improved system performance

Mosque Financial Management System

- Developed financial tracking system with structured data modeling
- Implemented reporting features for better visibility

EDUCATION

Bachelor of Computer Science (Software Engineering) — University Malaysia Terengganu (2022–2025) Perak Matriculation College (2021–2022)

CERTIFICATIONS

- IBM Full Stack Developer Professional Certificate
- Docker Foundations Professional Certificate
- Ubuntu Linux Professional Certificate
